- Tour of the school and observation of vocational preparation classes.
- Closing discussion with Jürgen Artmann; Headmaster of Freiherr vom Stein Vocational College
- Sightseeing in Münster

New welding machines

Students studie center

Ruth and Inger at Pinkus Brewery

**Outcomes – as a result of jobshadowing:**

**Groupe Mobilities** will take place for the first time as an exchange between EUX basic course 1 and the equivalent students from BK Werne. The activities will take place this autumn where first the Danes will visit and interact with the students at BK Werne and then, the students from BK Werne will come to Denmark and work with a program together with the Danish students. The participating teachers will make out the frame-work and involve the students as much as possible in the planning.

**Metal departments** will be the next trades in focus for further collaboration. First step will be job-shadowing where German metal teachers visit EUC Lillebælt.

**FAB Lab** at BK Werne has great potential for future collaboration involving the subjects of technology.

**Transport departments** will continue the great collaboration where exchanges of apprentices take place each autumn and each spring. Next exchange is now scheduled.

Company visits at already involved participants; **Getränke Weidlich** and **EDG** in Dortmund, were interesting. We received a warm welcome and had a thorough introduction to their approach to apprentices and training. They also introduced to us which activities our previous students had been involved in.

**It was a great program and a altogether successful job-shadowing which has revealed more potential collaboration then first anticipated. We look forward to our mutual Erasmus+ activities of the future.**

Thank you to Freiherr-vom-Stein Beruffskolleg Werne.
